My research focuses on **machine learning interpretability**. Currently, I conduct research on the **representation learning of Transformers**. In my previous research includes (mis)alignment of LLMs [6], explaining computer vision models [5], human-centered explanations [1,4], and explaining multimodal ML models in medical applications [2,3]. I aim to **increase understanding of AI systems**.

Education

- Oct '24 – present **PhD Student in Machine Learning**, University of Antwerp, Belgium, advisor: Prof. Dr. David Martens [↗](#)
- Oct '21 – June '23 **MSc in Data Science**, University of Warsaw, Poland
- Oct '18 – June '21 **BSc in Economics**, University of Warsaw, Poland

Publications

- [6] **M. Cedro**, T. Ichmoukhamedov, S. Goethals, Y. He, J. Hinns, D. Martens. Cash or Comfort? How LLMs Value Your Inconvenience. In *Communications of the ACM*, 69(9), 58-66, 2026. [↗](#)
- [5] **M. Cedro**, M. Chlebus. Scaling Vision Models Does Not Consistently Improve Localisation-Based Explanation Quality. In *Scientific Reports*, 16(1), 28613, 2026. [↗](#)

Conference Presentations and Talks

- FAIR, Research Day, 2026**. Cash or Comfort? How LLMs Value Your Inconvenience. (oral)
- Antwerp Center on Responsible AI, 2026**. Cash or Comfort? How LLMs Value Your Inconvenience. (oral)
- FAIR, Research Day, 2025**. Risks of LLMs' Valuation of Human Discomfort. (poster)
- World Conference on Explainable Artificial Intelligence, 2025**. GraphXAIN: Narratives to Explain GNNs. (oral)
- Antwerp Center on Responsible AI, 2025**. Narratives to Explain AI Models. (oral)

Work Experience

- Sept '24 - present **PhD Student**, University of Antwerp, Belgium
- Research in **Interpretable Machine Learning** (Explainable AI) in Prof. David Martens' research lab.
- Jan - Sept '24 **AI Research Scientist**, MI2.AI (now Centre for Credible AI), Poland
- Conducting ML explainability research in Prof. Dr. Przemyslaw Biecek's research lab. [↗](#)
 - Developing and explaining multimodal machine learning models (tabular-image data) for medical diagnosis of glaucoma disease.
- Jun - Nov '23 **Machine Learning Engineer**, Synerise, Poland
- Developing BaseModel.AI, a foundation deep learning model for behavioural data modelling. [↗](#)
 - Developing and fine-tuning deep learning models for classification, recommendation, and regression on clients' datasets of millions of users.
 - Cooperating within ML Research and ML Engineering teams.
- Jul - Dec '22 **Machine Learning Engineer**, Data Juice Lab, Poland
- Developing deep learning computer vision models for medical disease classification and segmentation.
- Feb - Jul '22 **Data Scientist**, Health Labs Care, Poland
- Machine learning modelling and data analytics.

Summer Schools and Trainings

- June '26 **Machine Learning Summer School on Safety & Reliability**. Focused on AI safety, understanding, and alignment of ML models. Lectures were conducted by Prof. Wojciech Samek (TU Berlin/HHI), Jan Betley (Truthful AI), and Fazl Barez (Oxford), among others. [↗](#)
- April '26 **Technical AI Safety Course** by **BlueDot Impact**. The course covered the current problems and research approaches in technical AI safety, including AI alignment, mechanistic interpretability, evaluations, red-teaming, and AI control. [↗](#)
- June '24 **Summer School on Artificial Intelligence for Biomedical Applications**, organized by Prof. Dr. Franco Scarselli at the University of Siena, Italy. The summer school focused on Graph Neural Network modelling of medical data and Explainable AI. [↗](#)

Teaching

- fall '26 **Python for Machine Learning** (master course) - lab sessions & project supervision, 140 students
- spring '26 **Data Engineering** (master course) - lab sessions & project supervision, 50 students
- fall '25 **Python for Machine Learning** (master course) - lab sessions & project supervision, 140 students
- fall '24 **Python for Machine Learning** (master course) - lab sessions & project supervision, 140 students
